DETAILED ACTION

1. To clarify all the ambiguities with the amendments and mailing problems, the examiner understands that all claims have been canceled except for claims 26-27. Therefore, claims 26-27 are the only pending claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinzmann (#3,962,957) in view of Focke (#4,385,479). Hinzmann shows delivery means 37, curling means 17 which is downstream from delivery means 17 and feeding roller means 28, 16, 39 which are downstream from curling means 17 to feed the web to create the curls. Hinzmann does not show the feeding means as claimed that are downstream from the curling means. Focke teaches the basic concept of using a pair of rollers 17, 18 that work in combination with conveying belt means 20, 21 to feed a web of material to create a reliable conveying and guiding of a web with severing in a simple manner (col 1 lines 45+). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Hinzmann with feeding means as taught by Focke to provide for reliable feeding means in a simplified manner.

Art Unit: 3721

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
